EDUCATION

BSc in Software Engineering

University of Southern Denmark

September 2024 - current

Programming of Digital Technologies

Stredná priemyselná škola elektrotechnická Zochova 9, Bratislava

September 2020 - 2024

TECHNICAL SKILLS

Languages	Frameworks
English	Web:
Python	NextJS
C#	Angular
HTML/CSS	ASP.NET MVC
SQL	Flask
Javascript	ML:
Typescript	Tensorflow
	Hugging Face

Development tools

Git

Jira

VS, VS Code

CAREER OBJECTIVE

Very curious software engineering student with a broad knowledge of various programming technologies acquired from high school and personal projects. As a motivated learner I'm hoping to gain valuable hands-on experience and further develop my skills in this field.

WORK EXPERIENCE

Report automation

Mattoni 1873

- June - August 2023

Bratislava, SK

Developed automation scripts to streamline communication between SAP and Excel spreadsheets, enhancing the efficiency of the accounting team

Utilized Microsoft VBA to create custom scripts that reduced manual data entry and minimized errors

Intern

Matsuko | Holographic presence

- May 2022

Košice, SK

Participated in meetings and observed the work dynamics of a scrum team within a small start-up

SOME OF MY PROJECTS

- Sonar

Built and programmed a tool for 3D mapping of lake bed
- Stock price prediction

Implemented a machine learning model to predict future stock price leveraging historical data
- Autonomous cricket farm

Constructed feeding, watering and heating mechanisms utilizing Raspberry Pi for control, based on inputs from various sensors
- Websites

Store (Nextjs + MongoDB), Chat app (Angular + sqlite), Blog (.Net)
